

VETERINARY SUPPORT WITHOUT LEAVING YOUR HOUSE

All employees enrolled in PetPlus have access to a 24/7 pet telehealth, powered by AskVet.

It's Saturday morning and your cat is refusing to eat her breakfast. You're not sure if you should take him to the ER and your primary veterinarian is closed.

Or maybe your dog suddenly began digging holes in your yard, and you don't want to wait for his next wellness visit to get tips on managing his new behavior.

AskVet can help!

HOW IT WORKS

1. Login to your PetPlus account. Need help accessing your account? Call (888) 891-2565.
2. In your account, you can chat with an AskVet veterinarian.

You have pets, AskVet has answers!

"Samantha did not have any problems from eating the 1/2 bar of soap. But if she had, Dr. Aimee told me all the signs and symptoms to look for in case I needed to take her to the vet. I love this service."

-Tonya J., Georgia
